

PROJECT ARCHITECT

Responsibilities include but are not limited to drafting and document preparation of multiple assigned projects. Must be able to coordinate and manage the design team process from project analysis through construction completion.

QUALIFICATIONS

- Preferred licensed architect in Hawaii
- 5-10 years of professional experience in architecture and design
- Experience working with clients to determine requirements including familiarity with building codes, detailing, and project scheduling for building projects
- Experience coordinating projects - leading teams of staff and consultants, guiding client decision-making
- Expertise in developing schematic designs and specifications from concept to construction documents
- Attend building worksites to ensure work is being done according to architectural plans
- Expertise in Revit, AutoCAD, Sketch-up, Adobe Illustrator and Adobe Photoshop or other rendering software a plus
- Motivated and self-reliant

SKILLS & EXPERIENCE

- Bachelor of Architecture or equivalent professional degree
- 5+ years of experience working with an architectural design firm
- Specific mixed use, commercial and/or hospitality, office architectural project management experience is preferred
- Strong verbal, written and presentation skills are required
- Ability to perform duties at other than normal working hours and days as required by projects or tasks
- Ability to produce 2D and 3D design drawings for meeting presentations
- Must be knowledgeable in the applicable building codes
- Team player with a positive attitude
- Ability to manage multiple projects simultaneously
